Description

As one of the largest teaching agencies for schools and academies in the UK, Protocol Education is uniquely positioned to support international schools in their recruitment of English-medium teachers.

We have well-established recruitment operations in five English-speaking countries and an active database of UK teachers looking to develop their careers internationally. This gives our international clients access to a pool of committed, motivated, high quality teachers.

As Associate Members of BSME, COBIS and FOBISIA, we are aware of the requirements and expectations from linked member schools and we feel well placed to provide numbers of excellent teaching staff for your requirements.
