Description

With over 130 years' history of quality independent school education in the UK, we are proud of the Belvedere School education tradition. Following the successful launch of our franchise partner school in the Middle East we have evolved into a forward thinking, innovative organisation, offering a number of opportunities from a full Belvedere Schools franchise, consultancy and management package to recruitment solutions for schools across the Middle East. Every child deserves the best educational experience, so that is why we offer a premium quality service to not only our partners but to any schools requiring our expertise. We specialise in the supply of teachers and school leaders within the Middle East and offer an executive, unique and personalised service. Our candidates go through a rigorous and exceptionally thorough recruitment and selection process (as used in the UK) to ensure they have what it takes to make a difference to the education of the children in your school. We arrange lesson observations for all candidates and conduct face to face interviews, as this is the only way to seek out passionate, high-calibre, committed and resilient individuals. Our comprehensive marketing and advertising service, exclusively designed for your school, will ensure that we present to you only the best and most suitably qualified candidates who are in a position to accept your offer of employment. We encourage tours to our own flagship school Belvedere Prep (Liverpool, UK) established in 1880, so that you can experience first-hand the unique combination of traditional values and standards balanced against 21st Century learning.
