Description

Planet eStream is an innovative browser based media content management and delivery system. It enables organisations to create, brand, theme and manage their own secure "You Tube" style media archive and distribute that content on demand, via VLEs, websites, PCs, mobile devices and digital signage displays. Planet eStream is designed to be installed on your own physical or virtual server ensuring that you have full control and ownership of your content and minimum impact on your bandwidth.

We have over 1600 educational client sites worldwide comprising many top UK independent schools including Sherborne Schools, Harrow School, Dulwich College, Shrewsbury School, Charterhouse School, Marlborough College, Wellington College, Rugby School, Millfield School and many more.

Planet eStream offers the following key features;

- Video on Demand
- Live Streaming
- Digital Signage
- Mobile Device Support
- Photo and Video Archiving
- Classroom Capture
- Lesson Observation
- Video Assessment Tools
- Seamless Integration with Leading VLES, Library Management Systems and Management Information Systems
- Specific Plug ins for Moodle, Firefly, Blackboard, Canvas and Frog VLES
- Specific Plug ins for Eclipse, Softlink, Sirsi Dynix and Heritage

- Specific Plugin for iSAMS
- Branding and Customisation Tools
- Responsive Web Interface
- Sophisticated Control Over your Content Via an Advanced Administration Console.
