Description

SHOW MY HOMEWORK is the global leader in online homework software, aimed at helping teachers, students and parents to manage the homework process.

Teachers:

Our product ensures that homework is set effectively across the school, with statistics available by year, class, teacher and subject. Teachers can benefit and save time from setting homework in advance, reusing an abundance of resources, and even automatic grading.

Students:

The ease of use and accessibility gives students a clear homework picture and allows them to prioritise their workload and stay organised using their personalised calendar, to-do list and email and mobile app reminders.

Parents:

We have given the power back to parents, allowing them to take an active role in their children's home learning, keeping tabs on homework online or via our mobile apps.
