Description

Transforming the way schools access, manage and communicate information, iSAMS offers a world-class Management Information System (MIS) that is intuitive to use, flexible in its approach, and accessible globally via any platform and any device - perfect for connecting the whole school community.

Our experienced and dedicated software team is constantly developing and enhancing the MIS with its extensive portfolio of integrated modules and online portals. This allows our schools to streamline and enhance their information management while they focus on delivering excellence for their pupils.

We are proud that over half a million users worldwide - including teachers, parents, pupils, data administrators and school staff - use iSAMS every day to benefit their unique data needs.

Originally created by our two co-founders for Rugby School whilst studying there as sixth-form pupils, iSAMS is now used by over 350 schools worldwide including a number of schools in the middle east. Some of these include Cranleigh School Abu Dhabi, Dubai English Speaking School (DESS), English Modern School Al Khor, Sherborne Qatar, GEMS Wellington International School and The American-British Academy Oman as well as highly acclaimed schools in the UK such as Harrow and Eton College. A full list can be found by visiting www.isams.co.uk/why-isams/clients/

If you would like to discuss how iSAMS can support your information management and school system requirements, please call us on +44 (0) 1604 659100 or visit www.isams.co.uk
