Description

Supplying schools in 128 countries, CES Holdings offers a one stop shop for all educational material from the United Kingdom (and indeed from the USA); this comprises all a school's book requirements and educational supplies across the curriculum. Equally important is our project work where we become involved in equipping new schools from scratch. This includes the general furniture and the design, supply and installation of the specialist areas such as laboratories, libraries, DT rooms etc.

Our on-line order tracking service and the book search facility on our website have proved valuable additions to our service which, on top of the reduced freight and other savings that we pass on to schools, keep CES Holdings at the forefront of international educational supplies.
