Comments/Description

Regent International School, Dubai is an international day school located in 'The Greens', which offers the 'Early Years Foundation Stage Profile' followed by The UK National Curriculum from Year 1 to 9, with IGCSE & A/AS levels from KS4 onwards and The International Baccalaureate Diploma Programme (to be offered in 2014).

The school implements UK assessment procedures, including Early Years Foundation Stage (EYFS) profiles. In the later years of school, KS1 - 3 students' attainment is assessed using the UK curriculum standards. Throughout the year we provide parents with evidence of their child's progress and learning, and opportunities to actively participate in their child's education.

At RIS we are committed to the pursuit of excellence where every child matters and achieves their potential. We are an inclusive school which celebrates the international background of its students promoting tolerance between races and developing an understanding and appreciation of different creeds and cultures. We encourage student involvement in community activities which enables them to become responsible and informed members of society.

We promote personal growth and nurture students into citizens who will be well-prepared for life, able to think, care and listen with the courage of their convictions, to take action and to adapt, when necessary, to life changing circumstances, thereby living meaningful and fulfilled lives.

Our curriculum is balanced by a range of extra-curricular and sports activities, and is enriched through the integration of an holistic "Education in Human Values" (EHV) program which result in students manifesting ethical conduct, courtesy, humility, kindness and respect when interacting with one another.

Classroom and specialist teachers are mostly recruited from the UK and are highly qualified and experienced. Continuous Professional Development and keeping updated with educational initiatives is important to all at RIS to ensure that we deliver the very best in teaching and learning that we are able.

Finally at RIS we believe that through the process of enlightenment comes empowerment which results in personal excellence.

Enlighten, Empower, Excel.
