Comments/Description

SRS combines Islamic values with modern enquiry based learning enabling students to achieve their best through responsible behaviour and educational excellence to become successful local and global citizens. The School of Research Science first opened in September 1998. Its aim is to provide a Western-style skills-based education within an Islamic Framework. The school caters for Emirati and International students and currently serves FS1 to Year 12. The staff are dedicated and highly qualified, and follow the English National Curriculum as well as UAE Ministry Arabic Curriculum. Both primary and secondary school premises are purpose-built and light. Facilities include two swimming pools, large gymnasiums, networked classrooms and computer rooms. The Primary School has Science, ICT and Design Technology Laboratories, 1 Library and grassed and hard court sports facilities. The School follows the best practice in education and has a family atmosphere supported by a strong pastoral system.

The Secondary School has 6 Science Laboratories, 2 ICT labs and 1 Library. Classrooms equipped with interactive whiteboards are the norm in both primary and secondary classrooms. National Curriculum staff are recruited directly from the UK. Classes are generally small, teaching materials are carefully planned.
