Comments/Description				

The British School Al Khubairat (BSAK) opened in 1968 to provide a British education to the British and native English speaking community. BSAK is a not-for-profit community school which offers a British Curriculum based on best UK and international practice, focusing on the whole child and maximizing student potential both academically and in co-curricular activities.

BSAK welcomes students who seek to optimise their educational experience through both the curriculum and the many enrichment activities that the school offers. Although priority will generally be given to British children and other native English speakers, we welcome applications from all prospective students.

Applications must be submitted annually, and dates for submission for the beginning of the next academic year will be announced in the Autumn Term. Applications are also encouraged at all times for places that may become available during the school year.
