Special Needs Provision

Comments/Description

Our Vision is to provide a student centered learning environment where our children are authors of their own learning and become authors of their own futures. We want our children to be prepared for the challenges of life and have the critical skills and communicative abilities to tackle those challenges that have yet to manifest, in this rapidly evolving society. Our children will be confident individuals who are comfortable in taking risks but have the values to act with thoughtfulness and humility. They will be successful in the path they choose and be tolerant and respectful of all cultures and beliefs. They will be lifelong learners that find inspiration and happiness as part of their daily lives.

Our Mission

Our mission is to fulfill our vision through a challenging learning environment that encourages high standards and expectations through development-appropriate instructions that allow for individual differences and learning styles. We will do this through the use of qualified teachers who have the best of their children at heart and are able to deliver stimulating lessons that foster inquiry and creativity. We will do this within a safe and nurturing environment that supports and encourages each child academic, personal, physical and social growth. We will do this through a co-operative and proactive relationship with the parents, making them part of the educational process. We will do this in an environment where learning is enjoyable.
